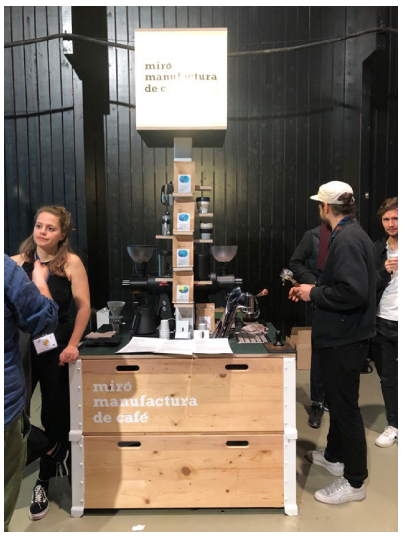
miró coffee station
Factsheet



Capacity

Output
1 Barista serves in 8 hours approx. 300 – 350 coffee drinks.

Extension
The coffee station can be upgraded with additional machines or several individual stations in order to best serve your event set-up and needed capacity.

Space

The set-up needs a minimum of 2x2m + some storage

Electricity

Plug 1	230V; Stecker Typ J
Plug 2	380V, 16A; Plug Type CEE16

Placement

Indoor. Depending on the weather conditions or roof availabilities, outdoor could be possible. In that case we do suggest considering the truck option if there is enough space.

Water

We do have tanks. But accessibility to tap water to refill the tanks is welcomed.
